Friends,

It is with great pride that we in your State Fire Marshal's Office share the activities of the state wide fire and emergency services for 2010. The contributions of the dedicated men and woman on the Louisiana fire service are unmatched. Lives and property are saved everyday as the result of fire prevention and fire suppression activities. We should never forget the task at hand is to build a safer state while enhancing fire protection capabilities and promoting economic development in every community.

I must take a moment to highlight some of our enhancements and accomplishments in the OSFM. We continue efforts in working with our industry partners as we incorporate new technologies in construction and bring in new business to our state. With the opening of the Lake Charles District office, we are that much closer to our goal to be more readily accessible to all areas of the state, fostering safe economic development. The state's Urban Search and Rescue team continues to grow and is working hard to develop Type III teams in every region. The introduction of the Arson Task Force trailers serve to provide assistance and training in fire investigation to local fire service, thus building partnerships and helping to more accurately determine fire causes. In 2010, we experienced the largest man-made disaster in our nation's history – The Deep Water Horizon explosion and oil spill. SFM personnel worked to diligently to expedite inspections in order to provide safe code compliant accommodations for the nearly 4000 response and recovery personnel from across the country

In our ongoing effort to reduce the loss of life due to fire, our office launched Operation Sav-a-Life. This state-wide cooperative effort between our office, the local fire service, Kidde and Home Depot aims to promote the installation of 10-year lithium sealed batter detectors in the homes of folks in need. In addition, our Arson team developed and deployed Operation Golden Shield, a safety program geared towards seniors.

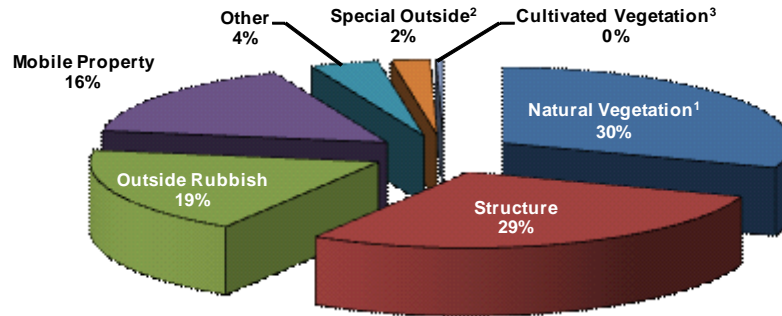

Clearly, we want the professionals of design, construction, fire protection, government leaders and business to find our office to be their friend and partner in progress. We are approachable, accessible and we build consensus to safety and progress in Louisiana. Never hesitate to call on us. We are your friend. Thank you all for what you do. You are all protectors of others.

Yours in Protection,

H. "Butch" Browning
State Fire Marshal

2010 Louisiana Fire Statistics

Fires by Type

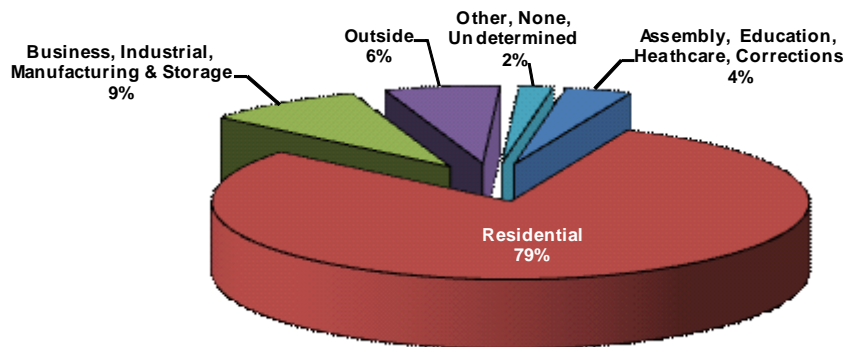

1-Natural vegetation includes forest, brush and grass

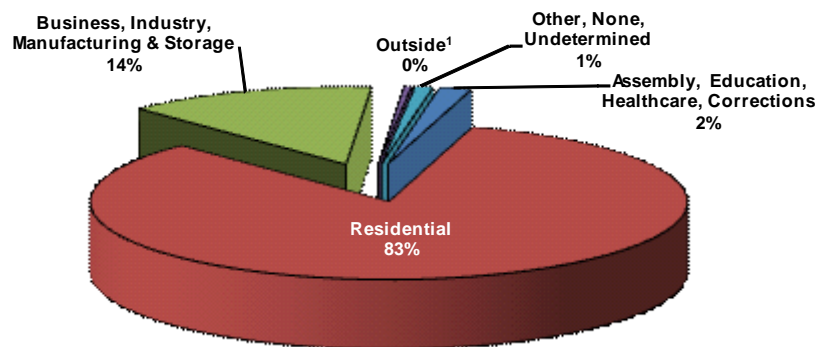

2-Special outside includes non-structural storage areas and outside equipment

3-Cultivated vegetation (crops) fires accounted for less than 1% of fires reported in Louisiana for 2010

Structure Fires by Property Use

Structure Fire Dollar Loss by Property Use

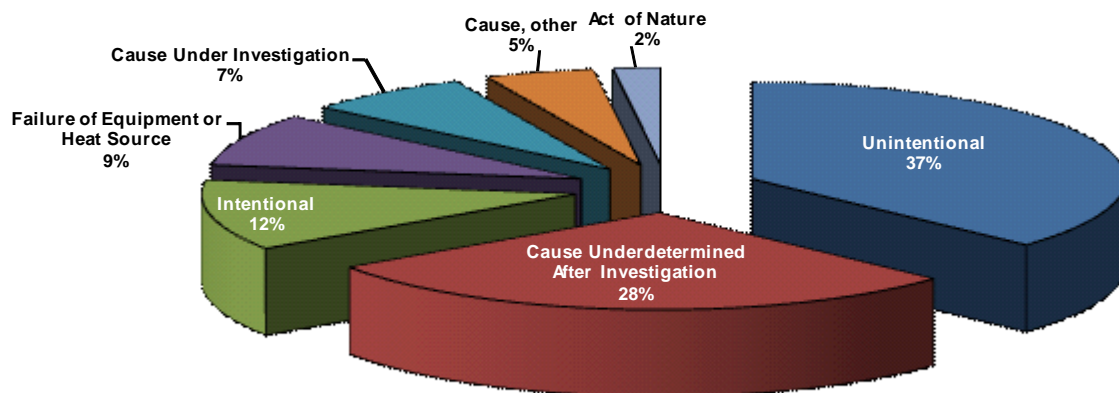

1-Outside property use accounted for less than 1% of reported structure fire dollar loss in Louisiana for 2010

2010 Louisiana Fire Statistics

Cause of Ignition

2010 Louisiana Fire Statistics

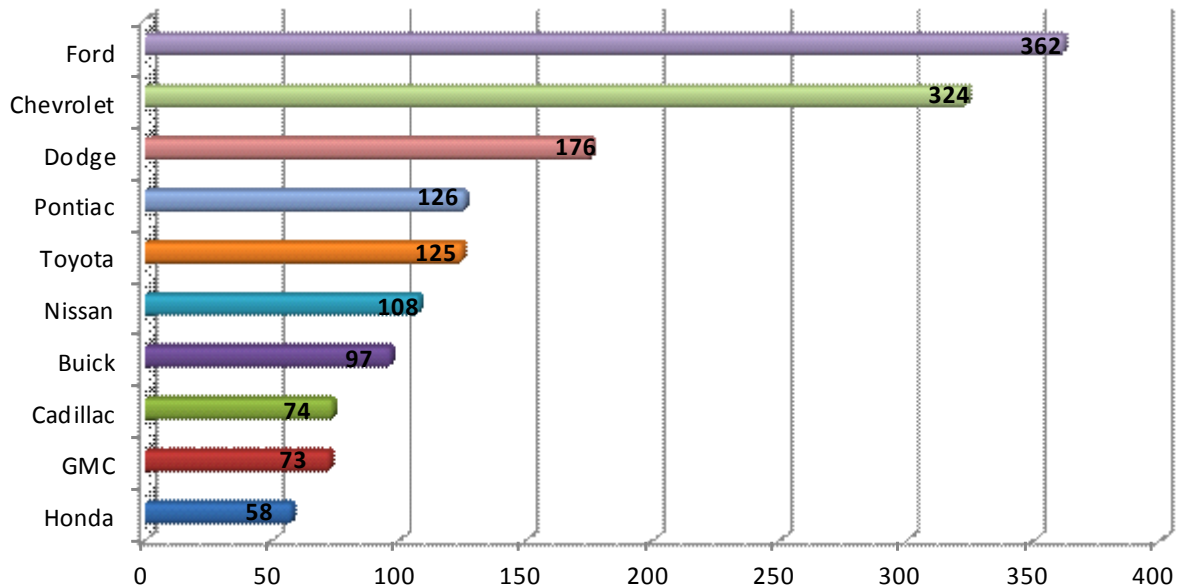

Area of Fire Origin in Passenger Vehicles

In 2010 there were a total of 2,540 reported passenger vehicle fires , 12% of all fires reported.

Percentages are tabulated against total number of reported fires in these prominent passenger vehicle areas

Passenger Vehicle Fires by Make

This is only a report of the number of fires reported by make and does not take into account the number of vehicles of each make on the road.

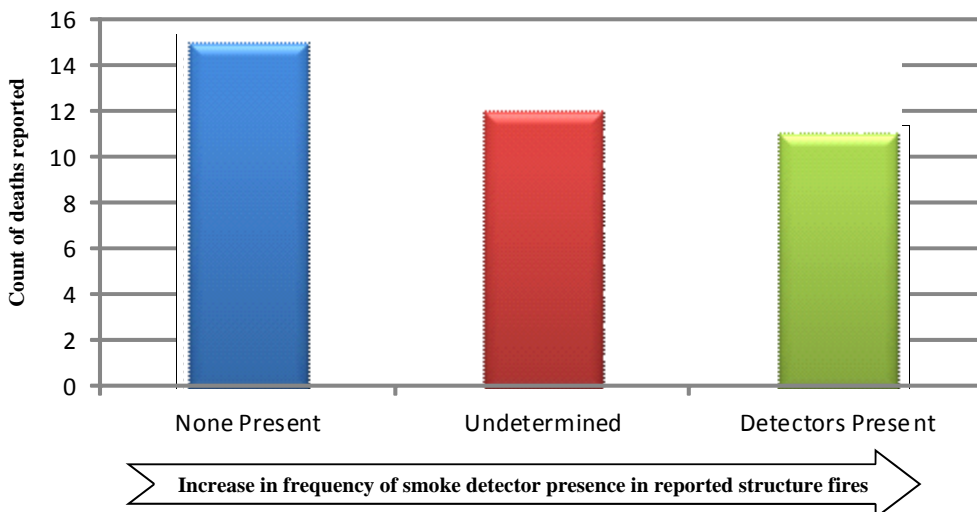

2010 Louisiana Fire Statistics

Area of Fire Origin in Residential Properties

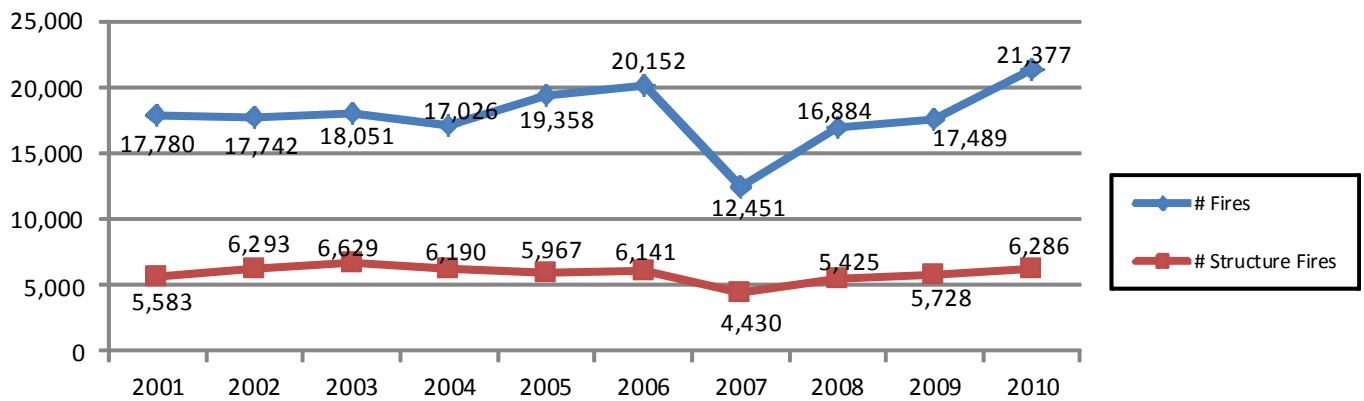

Percentages are tabulated against total number of reported fires in these prominent residential housing areas

Relation of Smoke Detector Presence to Fire Deaths in Residential Structure Fires

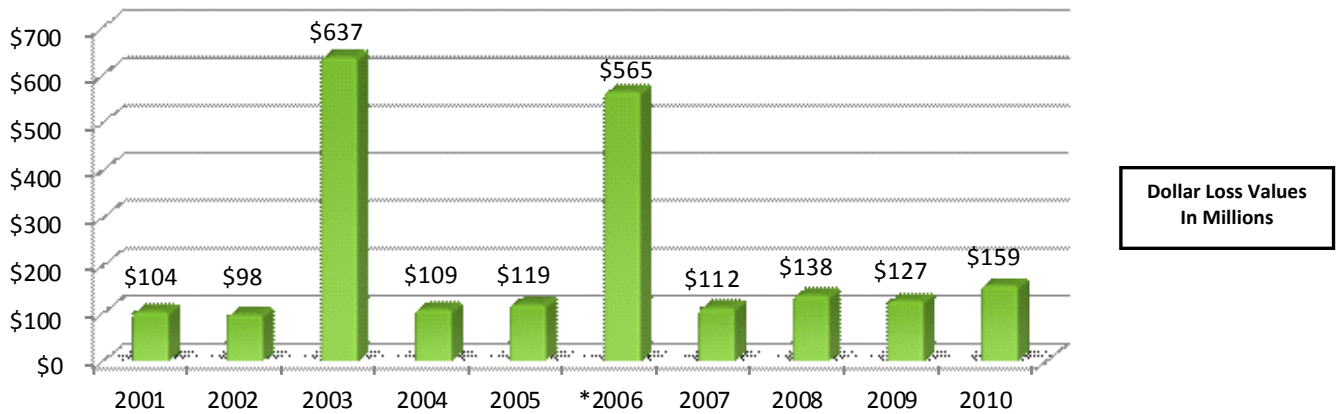

In 2010, residential fires accounted for 80% of all structure fires in Louisiana. Residential Structure Fires continue to be the most common and deadly type of fire, demonstrating the need and importance of home fire prevention and safety practices.

Louisiana Fire Statistics 10 Year

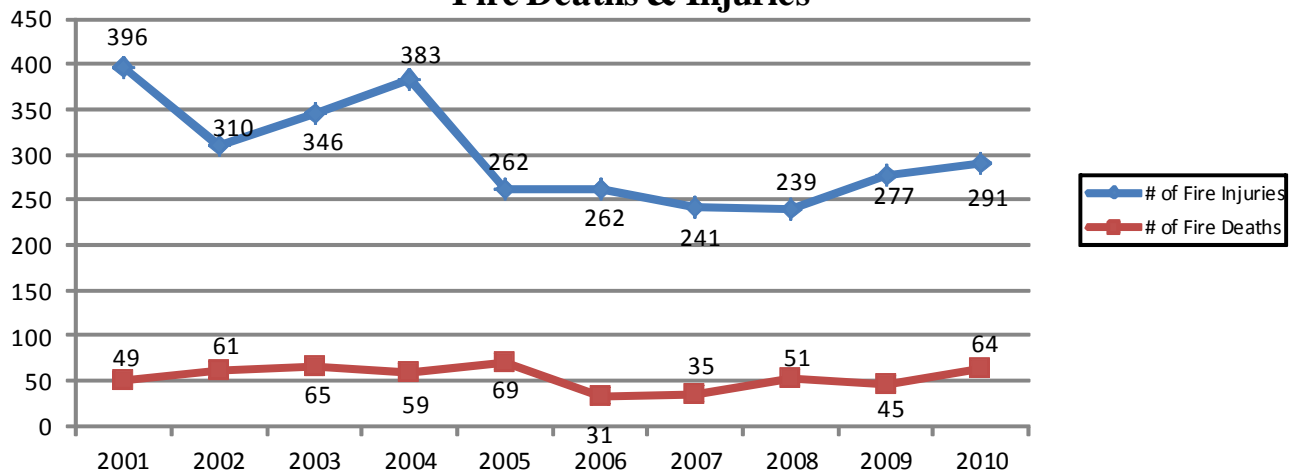

Total Fire Dollar Loss

* Total adjusted for outliers.

Fire Deaths & Injuries

Counts include both non-fire service and fire service fire related injuries and deaths.

Summary By Incident Type

Report Period: From 01/01/2010 to 12/31/2010

	Civilian	Fire Service
Fire Related Injuries	144	147
Non-Fire Injuries	205	94
Fire Related Deaths	64	0
Non-Fire Deaths	45	0

Louisiana Fire Incident Reporting System (LFIRS)

This section of the State Fire Marshal's office is charged with the collection and analysis of the incident data submitted from participating Louisiana fire departments in an effort to determine the impact of both man-made and natural disasters, especially fire, on the lives of our citizens and property in Louisiana. LFIRS (NFIRS) is the program through which this data is collected.

LFIRS (NFIRS) is **all incident reporting**. To show and tell the full value of the fire service, all alarms including EMS responses and public service calls should be documented in LFIRS. National statistics show that only a small percentage of all calls to which a fire department responds are fire-related. In Louisiana, for the year 2010, this percentage was just a little over 10%. Many departments continue to report only their fire calls, thus these departments, the communities they protect, and our state lose a vast amount of data as well as full recognition for the efforts of our fire service.

What can LFIRS do for Louisiana's Fire Departments?

-  Summarize annual activities;
-  Determine needed improvements within the department (i.e., response times, training)
-  Assist with justification of budget requests and provide a basis for resource allocation;
-  Maintain eligibility for fire service grants through consistent LFIRS participation;
-  Answer questions about the nature and causes of injuries, death and property loss resulting from fires;
-  Identify fire trends and predict active "seasons" within your community;
-  Measure the success of fire prevention and safety programs;
-  Earn bonus points applied toward your PIAL rating with consistent participation in LFIRS.

We commend and encourage the continuing efforts of our fire departments to embrace electronic reporting. With the increasing demand for "real-time" information, electronic reporting provides a more efficient means to collect incident data, confirm report submissions, notify departments of reporting errors, and offer more ready assistance in completing incident reports.

The LFIRS section of the State Fire Marshal website offers a wealth of information and help in regards to LFIRS reporting including monthly statistical summary reports. Please visit us at <https://lasfm.org>.

The LFIRS State Program Manager is Cindy Gonthier. If you have questions or need assistance regarding LFIRS reporting, please contact Cindy at the State Fire Marshal's office:

Louisiana Fire Incident Reporting System (LFIRS)

The table below represents the information in the NFIRS database for Louisiana for 2010 and fire department information maintained in the asset tracking database.

Total Active Louisiana Fire Departments (In NFIRS database)	597
Total Active Fire Departments Reporting	358 (60%)
Total Active Fire Departments Not Reporting	239
Total Paid Firefighters (Approx.)	5273
Total Volunteer Firefighters (Approx.)	10,856

The figures above show an 34% increase in the number of “active” fire departments submitting LFIRS (NFIRS) data from 2009. We continue to identify departments that have either merged with other departments, creating a single reporting unit, or are no longer in existence. Obtaining an accurate count of active departments is important to our state’s reporting statistics.

The following pages indicate which departments had incident data recorded in the NFIRS database and which departments did not have data recorded in the NFIRS database for the year 2010 as of May 4, 2011, 9:02 am . For your convenience, the fire departments, along with their fire department identification number (FDID) are listed by parishes.

Incident reports are expected from each “active” fire department listed in the NFIRS database. If no reports are recorded under your department for the given time frame, your department will show as “Not Reporting”. Names are posted exactly as they appear in the NFIRS database. All data files submitted to the LFIRS.reporting@dps.la.gov email were processed prior to the compiling of the data used in the incident statistics posted in pages 4-9 of this annual report.

Once again, we would like to thank all of those departments who submitted incident data and look forward to new relationships with those that want to further the life and property saving efforts of our fire service as well as start getting that much deserved credit for all they do!

Disaster Recovery!

Deep Water Horizon 2010

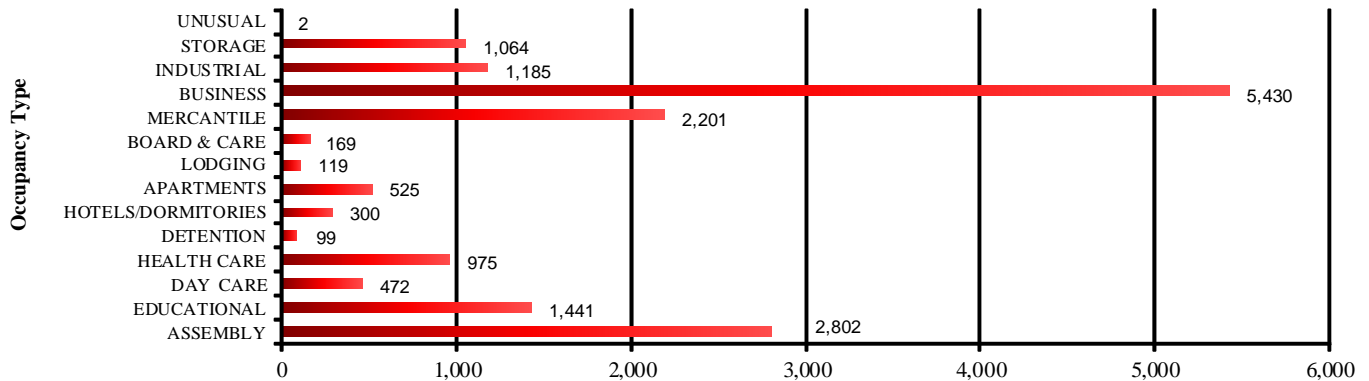

In the wake of the devastating oil spill resulting from the explosion of The Deep Water Horizon drilling rig in the Gulf of Mexico, several thousands of personnel were mobilizing in south Louisiana in order to help with the clean-up effort. This rapid influx of personnel created an immediate need for both temporary and long term code compliant structures to house these persons. The Louisiana Office of the State Fire Marshal responded to this urgency by placing inspectors and a plan review architect at the BP Emergency Command Center to coordinate expedited occupancy of safe shelters.

The effective response efforts of the Office of the Louisiana State Fire Marshal and our state-wide network of emergency responders to this incident as well as Hurricanes Gustav and Ike have laid the ground work for the development of National guidelines to the mitigation of major disasters.

Inspections Section

The Inspections Section (Fire and Safety) is responsible for conducting life safety code inspections of all buildings except one and two family residences and health care facilities.

Total Inspections 2008-2010

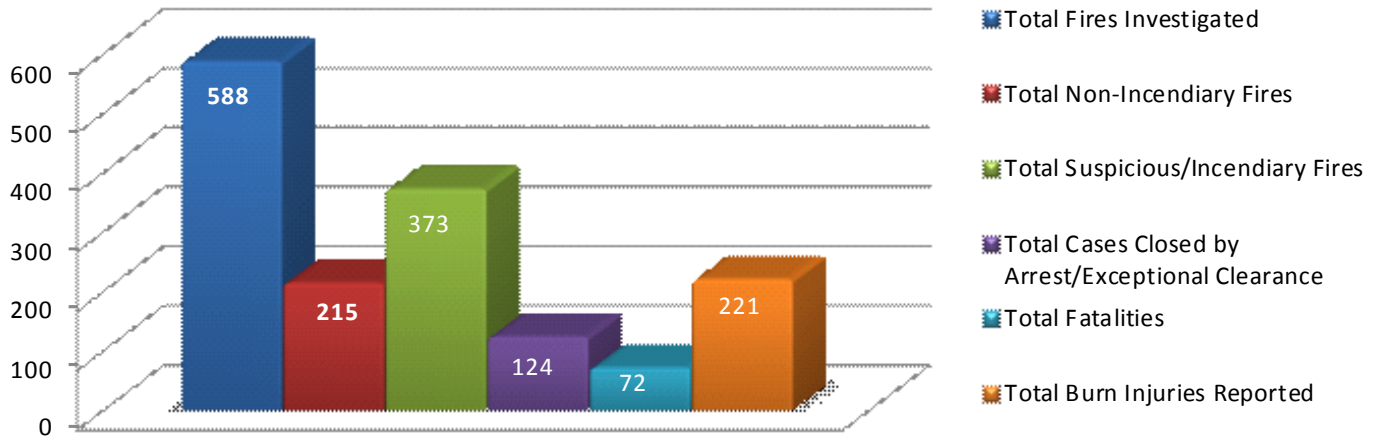

Effective July 1, 2010, inspections of new construction are conducted utilizing the 2009 Edition of NFPA 101 Life Safety Code and referenced NFPA standards. In addition, other codes and standards used are the Americans with Disabilities Act Accessibility Guidelines (ADAAG) and the State Fire Marshal Manual. Inspections of existing buildings are conducted utilizing the edition of the Life Safety Code that was adopted by the state at the time that the building was constructed. For example, if a building was constructed in 1970, the inspection would be conducted in accordance with the requirements as set forth in the 1967 Life Safety Code.

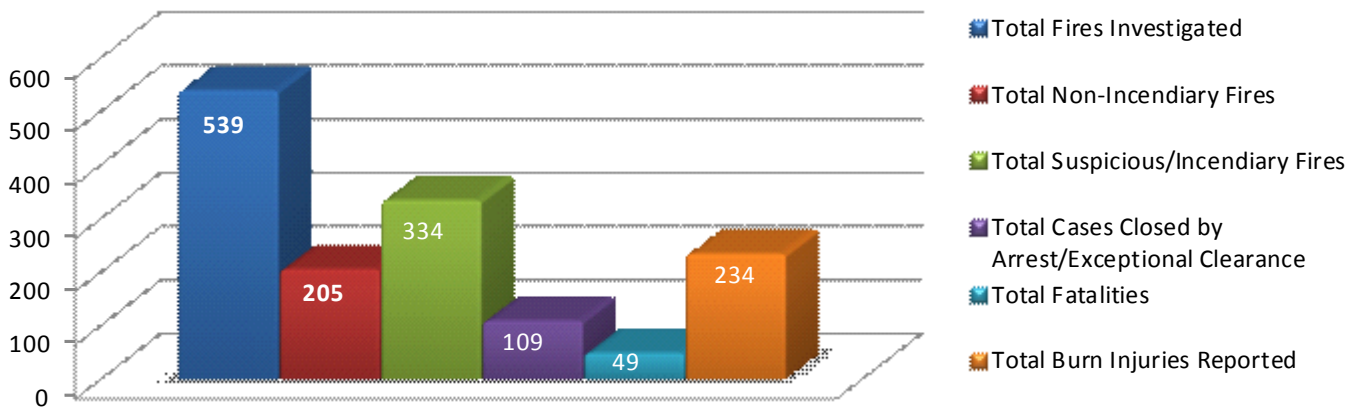

In order to provide efficient service to the public and allow facilities to open in a timely manner, the State Fire Marshal's Office maintained its goal of completing final inspections within two weeks of the inspection request. The first diagram above indicates the percentage of final inspections conducted in accordance with this goal. The second diagram indicates the total number of inspections for specific occupancy types.

Fire Education

It is the mission of the Louisiana State Fire Marshal's office to prevent and reduce the incidents of fire by increasing the awareness and knowledge of the citizens of our great state regarding fire prevention, fire education and life safety. We provide fire prevention and public fire education services through public fire and safety educational programs and regular life safety inspections of businesses and places of assembly. We provide fire investigative services to determine the origin and cause of fires and enforce fire and life safety codes through plan reviews for new construction, remodeling, and occupancy changes in commercial buildings.

Public Fire Education is extremely important to the Louisiana State Fire Marshal's Office because through fire and safety education we prevent fires, tragedies, and save lives. We take Public Education very seriously and feel that it is just as important for an adult as it is for a child. Our Public Fire Education team is very involved with the businesses in the community, with the schools, and other community groups.

The Louisiana State Fire Marshal's Office has designed, developed and implemented several fire and life safety initiatives designed exclusively to reduce avoidable injury and death as a result of fire.

"Operation Save-A-Life" was created to combat the rise in fire related injury and deaths to our citizens due to home fires in our great state. The goal of this statewide initiative is to dramatically reduce fire related death across the State of Louisiana by installing smoke alarms in homes across the state of Louisiana.

"Operation Golden Shield" is a public awareness campaign designed and developed to educate our senior citizens, their caregivers, family members and the general public to stop the alarming upward trend of senior fire-related deaths and injuries. This campaign focuses on Ten (10) important areas of fire safety; Home fire safety, kitchen and stove safety, space heater safety, candle safety, holiday safety, outdoor cooking safety, smoke and carbon monoxide detector safety and Smoking safety

"Fire Safety for Schools, Student & Teachers" was developed to educate our schools, student, teachers and administrators of the dangers of fire and to raise awareness of Fire Prevention and Intervention, Preparedness, Response and Recovery as it relates to fire safety and prevention in our schools.

"Campus Fire Watch-Louisiana" is a public awareness campaign designed and developed to educate our colleges and university residents, families and guests about the alarming upward trend of college dormitory and student housing related deaths and injuries as a result of preventable fire.

"Night Club Life Safety Task Force" The Task Force is dedicated to improving bar, nightclub and special event safety in Louisiana to identify potential hazards and raises public awareness about fire prevention and life safety. The task

force works closely with the bar industry, as well as event planners and suppliers to ensure a high degree of awareness and compliance of applicable building, safety and fire codes to promote a safe environment for staff and customers through fire and life-safety inspections.

Emergency Services

The Fire Marshal's office has consolidated its broad spectrum of emergency service activities into one cooperative effort to improve and enhance disaster preparedness initiatives, emergency response operations and long term disaster planning and recovery. This program directly and indirectly affects the estimated 4,523,628 citizens of the state of Louisiana that are exposed to natural disasters or acts of terrorism. This program encompasses the following services:

State Fire Marshal ESU (Emergency Services Unit) – A 40-man multi-hazard team trained in command, communications, and medical, and rescue, created to support local fire departments and state agencies in times of crisis, both natural and man-made.

Asset/Resource Inventory – As a function of Emergency Support Function (ESF)-4, we are tasked to coordinate and mobilize fire and emergency services resources, personnel and equipment; and coordinate other state resources to support local governments and other states to detect and suppress urban, rural, wild land emergencies. Our objective is to lead a collaborative effort within the Fire Service to assist and facilitate the acquisition, data storage and management of Resources and Assets that may be available in the event of a disaster or major catastrophe.

ESF-4 Disaster Preparedness Training Program – A State Fire Marshal initiative to educate fire departments and first responders to better prepare them in the event of natural or man-made disasters.

LA Statewide USAR Task Force: The Office of the State Fire Marshal in a collaborative endeavor with local and regional fire service partners established this task force to provide highly specialized technical rescue services to local jurisdictions and our neighboring states that are overwhelmed by natural and man-made disasters. Our communities are susceptible to many different natural and technical hazards that may result in the damage or collapse of structures within the state.

In May 2011, the Louisiana Statewide USAR Task Force deployed a team of 130 Louisiana first responders to Tuscaloosa, Alabama at the request of the State of Alabama officials to assist in rescue and recovery operations in Tuscaloosa, an area devastated by the recent tornados and related storms. The mission of the Louisiana USAR Teams, were to conduct secondary searches in a dense residential and commercial area of Tuscaloosa. Technical expertise was needed to ensure that no persons were trapped beneath the rubble prior to demolition and debris removal operations.

LA Statewide USAR Task Force: The mission of the Louisiana Statewide HAZ-MAT Task Force is to offer the highest possible level of protection to the citizens and visitors of the State of Louisiana from chemical, biological and radiological releases whether the release is intentional or accidental. with specially trained personnel to respond to nuclear, biological, and chemical releases upon request. The rescue of victims, hazard mitigation, technical guidance, and advanced medical support.

The Office of the State Fire Marshal in a collaborative endeavor with Louisiana State Police, GOHSEP, local and regional law enforcement and fire service partners established this task force to provide highly specialized responses to nuclear, biological, and chemical releases in our effort to support our local first responders in these types of large scale catastrophic emergencies.

Louisiana's "Fallen Firefighters Memorial"

Honoring those who've paid the ultimate price while protecting the citizens of Louisiana

The State Fire Marshal's Office in conjunction with the Walk of Honor Foundation, Louisiana Fire Chiefs Association, Louisiana State Firemen's Association, Professional Firefighters Association of Louisiana, Louisiana State University Fire & Emergency Training Institute team up to make this annual event a success.

The ceremony recognizing newly added fire fighters was held on Saturday, March 6, 2010. The following heroes were honored:

A. Shepherd Pfister
Jefferson Parish Fire Department
March 4, 2008

Frankie Nelson
Shreveport Fire Department
May 10, 2009

Tommy Lee Adams
Shreveport Fire Department
December 12, 2009

Cordell B. Buggage
New Orleans Fire Department
February 25, 2009

Joseph Grace
St. Tammany Fire District 4
July 12, 2009

Jason Simon
Lafayette Fire Department
December 20, 2009

Alan Hermel
Bossier Fire District 1
March 3, 2009

Richard Christiana
David Crockett Fire Department
September 11, 2009

May their names forever remain on our lips and in our hearts.

If you would like to donate to or purchase a brick in support of the memorial or participate in this annual event, please contact **Boyd Petty or Nathan McCallum at (800) 256-5452.**

The Louisiana State Fire Marshal Honor Guard

Established in 2004 the Honor Guard represents the office at special events and fire service funerals. The unit has honored many fire fighters by attending and coordinating individual funerals and the annual Louisiana Fallen Firefighter Memorial ceremony.

As tradition holds, the fire service has always had a strong Scottish/Irish influence. The unit has upheld this tradition by having kilted members who play the bagpipes and drums at events. The honor guard unit is made up of volunteers from the office and community. Besides traditional honor guard events, the unit is utilized to support the office's fire education program by distributing fire education material and teaching fire safety at parades and festivals.
