This public document was published at a cost of $2.04 per copy. This document was published by the Office of the State Fire Marshal to inform State Government and the general public of the agency’s activities for the 2003 calendar year. This material was printed in accordance with standards for printing by state agencies established pursuant to R.S. 43:31
The year 2003 has been a year of building for the future of the Fire Marshal’s Office. We have taken major strides in preparing to serve the citizens of Louisiana for years to come. In December, the Fire Marshal’s Office moved into its own building. This is a completion of a five year project. Additionally, the office applied for and received a one million dollar computer technology grant to propel the office into the future. This system will provide state of the art software, hardware and support allowing for the most efficient service possible. Additionally, this annual report is to be a true annual report in that it will report numbers from January to December instead of June to July. In light of this, we would like to ask all fire departments to submit their fire reports for the previous year by March 15th to allow for timely statistics. All of this in time for our centennial celebration next year. The year 2004 marks 100 years of protecting Louisiana and its citizens from the dangers of fire. Unfortunately, people are still not fully aware to the hazards of fire. Children still have access to matches, pots are still left unattend-
From 2002 to 2003, residential fires increased 1% to 85% of all fires in structures.

</table>

*Matches continue to be the most used tool in starting fires with 923 cases, however Heat from friction caused the most dollar loss at over 28 million dollars.*
In 2003, there were a total of 3,928 vehicles fires which was 25% of all fires.
2003 Louisiana Fire Statistics

Residential fires account for 85% of all structure fires and continue to be the most common and deadly type of fire, showing the need and importance of home fire prevention and safety practices.
Nationally, there are over 1.9 million fires which is one fire every 18 seconds.

In 2003 there was a substantial increase in property loss. This is due to several large loss fires.

*1997 & 1998 Does not include the New Orleans Fire Dept.

This year we are continuing to implement the NFIRS 5 (National Fire Incident Reporting System) program. We hope to see a continuing effort from departments to move from paper to electronic reporting. With the role of the fire department changing, there is now more than ever the need for the use of computers in our fire stations. To assist departments in this undertaking, we are offering our services to hold training classes on NFIRS 5.0. If your department would like to host a training class, please contact Nathan McCallum at: nmc-callu@dps.state.la.us or by phone at 800-256-5452.

The Louisiana State Fire Marshal’s Office would like to take the opportunity to thank those fire departments who have taken the time to submit fire reports over the past year. The information you submit allows us to better understand and effectively control the fire problem in the state. These reports provide very useful information for tracking fire trends in the state and developing fire safety education programs. However, we need all departments to report to have the most complete and accurate information regarding the fire problem in Louisiana. Please encourage any neighboring departments not currently reporting to participate in the LFIRS program. This year 292 or 49% of departments (as compared to 51% last year) reported fire incidents to the State Fire Marshal’s Office.

Additionally, this office strives to be the most progressive and efficient agency. To this end, a computer based reporting system has been implemented. Staff members continue to take an active role on the national level in developing, testing & improving the NFIRS 5.0 system. A current list of vendors offering NFIRS 5.0 software is on our website at www.dps.state.la.us/sfm/lfirs.htm.

Fire alarm system type, suitability of detection devices, methods of fire alarm initiation, and adequacy of notification devices are reviewed by the Fire Marshal's Office.
**Inspections Section**

Effective July 1, 2001, inspections of new construction are conducted utilizing the 2000 edition of NFPA 101 Life Safety Code and referenced NFPA other codes and standards used are the Southern Standard Building Code for high-rise buildings, Americans with Disabilities Act Accessibility Guidelines (ADAAG) and the State Fire Marshal Act. Inspections of existing buildings are conducted utilizing the edition of the Life Safety Code that was adopted by the state at the time that the building was constructed. For example, if a building was constructed in 1970, the inspection would be conducted in accordance with the requirements as set forth in the 1967 Life Safety Code.

In order to provide efficient service to the public and allow facilities to open in a timely manner, the State Fire Marshal’s office maintains its goal to complete new construction final inspections within two weeks of the date the final inspection is requested. The first diagram above indicates the percentage of final inspections conducted in accordance with this goal. The other diagram indicates a total number of inspections for specific occupancy types.

In order to ensure that inspections are being conducted in accordance with the adopted codes, rules, laws and regulations, last year District Supervisors and Assistant Supervisors conducted 8,429 field Quality Control inspections. The Quality Control Program includes conducting training inspections and revisiting facilities to ensure that the inspectors are citing codes properly and consistently. Supervisors and Managers use this information to improve the quality of inspections. The Inspections Section (Fire and Safety) is responsible for conducting life safety code inspections of all buildings except one and two family dwellings.

The staff of the
This section helps insure safety to the public by inspecting amusement rides.

The Mechanical Safety Section generated $1,316,936 dollars in 2003.
Risk Watch
The primary educational program for children from Pre-K through grade eight is Risk Watch, a comprehensive injury prevention program offered by the National Fire Prevention Association. With the help of sponsorships and grants, Risk Watch is currently being taught in University Lab Schools throughout the State, and in Hammond area schools. A coalition of organizations was formed to promote the program, the agencies involved are: State Fire Marshal’s Office, State Police, The Fire Chief’s Association, The bureau of EMS and the Department of Education.

In 2000, as a pilot program, the State Fire Marshal with the assistance of fire protection/sprinkler company, Fire Tech Systems of Shreveport placed the program into the states Elementary Lab schools. The schools involved were LSU, Southeastern, ULL, and Louisiana Tech.

In 2001 a $15,000 grant from NFPA enabled the education department to form a state level coalition team to expand the original goals for Risk Watch into a three-year statewide pilot. Five communities (a total of 100 classrooms) were selected to implement this pilot-Gonzales, New Orleans, Port Allen, Shreveport, and Slidell. Each community formed a coalition of local educators, fire, police and health officials, who attended a two-day training seminar in preparation for implementation in Fall 2002.

In 2002 a $30,000 grant from the NFPA was received to implement the Risk Watch program into 200 additional classrooms throughout the state. This expansion included the entire parish of West Baton Rouge, portions of East Baton Rouge and Jefferson parishes as well as many independent cities throughout the state. The grant enabled Risk Watch to be taught in 227 classrooms reaching over 5,000 additional students.

Risk Watch is taught and monitored using pre and post-testing. All results have and will be directed to NFPA in January 2004 for final analysis. Future plans include reaching out to the Home School Association and Head Start Program's, as well as expanding within existing communities and adding several new communities to the roster.

Results from last years Risk Watch program are very encouraging, The percent of knowledge gain from pre-post tests was over 15%.

Fire Department

Insurance available to Fire Fighters:
1. State Fire Marshal Volunteer Insurance
   $50,000 accidental death and dismemberment.
   $30,000 accidental medical expenses
   $175 accidental total disability up to 52 weeks

2. Scholarship for children of firefighters killed or disabled in performance of duty. Paid and volunteer for fees, tuition or other charity including room and board as long as child meets the academic requirements and maintains a "C" average. In addition such children shall be entitled to a cash grant of $240 per semester as an allowance for books etc.

3. $50,000 accidental death resulting in course of performance of official duties payment by State Risk Manager out to the self insurance fund credited in R.S.39:1533(A).

4. Public Safety Officers and Firefighter death benefits. Act USC 3796 et seq was enacted in 1976, as of 10/1/00 PSOB’s benefit increased to $267,494.00.

5. Louisiana State Firemen's Association - $15,000 Accidental death benefit.
What’s New at The Fire Marshal’s Office

New Building for the Office
Located at 8181 Independence Blvd
36,000 Square feet

Teleconferencing Equipment
Available in Baton Rouge, New Orleans, Shreveport, Lafayette & Monroe.
Used in place of traveling across the state.

New License Plates
Promote professionalism and allows for easier recognition and identity of fire marshal personnel.

New Access Control Panel
The State Fire Marshal’s Office in conjunction with the Walk of Honor Foundation is creating a memorial to firefighters who have perished in the line of duty. The memorial will consist of a life-size firefighter statue, a granite wall engraved with the fallen heroes’ names, a brass fire truck bell as well as a piece of I-beam from the World Trade Center.

Bricks may be purchased not only for a Fallen Firefighter, but also in memory or in honor of a loved one, or for your company, firm or organization.

If you are interested in donating to or purchasing a brick for the memorial, please contact Bob Cate at:
(225) 324-9509
