

All,

The Office of State Fire Marshal (OSFM) is taking another step on the path to meaningful regulation of the thousands of conveyance devices across Louisiana. While current law requires regulated conveyance devices to be registered by January 1, 2026, the OSFM recognizes that it will take some time to register the thousands of existing conveyance devices and will work with those actively working towards compliance.

In support of the registration process the OSFM has launched a Conveyance Device Registration Portal, allowing conveyance device owners, and those who manage those devices to submit the required registration data online.

Please access and register regulated conveyance devices at:

**[OSFM Conveyance Device Registration](#)**

Instructions for the Registration Portal are attached to this document at:

**[Instructions - Conveyance Registration](#)**

The OSFM will no longer accept submissions via email or other formats. Those who have previously submitted devices for registration, will receive documentation and an electronic registration certificate as we incorporate those submissions into the portal.

Additionally, we appreciate those who reviewed the purposed regulations recently, several suggestions have been incorporated. The proposed regulations are expected to be noticed in the Office of the State Registrar's December 2025 publication.

Should there be any issues or concerns regarding the portal please contact [Marlene.Aucoin@la.gov](mailto:Marlene.Aucoin@la.gov).
